

Name: K RAJ BHARATH K RAJ BHARATH | Reg. No: RA2511003011548

Unit – 4 : Session – 12 : SLO – 2 | Different Hashing Techniques — Match the Following

■ I. Answers

1. Linear Probing — E. Check next available index
2. Quadratic Probing — F. Use i^2 to resolve collisions
3. Double Hashing — G. Use second hash function
4. Chaining — A. Linked list at each bucket
5. Hash Function — C. Maps key to table index
6. Load Factor — B. Number of entries / table size
7. Open Addressing — D. All data in one array
8. Primary Clustering — H. Problem in linear probing
9. Secondary Clustering — I. Problem in quadratic probing
10. Hash Table — J. Data structure for fast search
