Unit – 4 : Session – 3 : SLO – 2 | Tree Traversals — In-Order Traversal

■ I. Algorithm for In-Order Traversal (Left, Root, Right)

- Step 1: Repeat Steps 2 to 4 while TREE != NULL
- Step 2: INORDER(TREE -> LEFT)
- Step 3: Write TREE -> DATA
- Step 4: INORDER(TREE -> RIGHT)
- [END OF LOOP]
- Step 5: END

■ II. In-Order Traversal — Tree 1 (root 46)

- Tree structure: 46 -> left 20 (right 22 -> right 29); right 69 (left 57; right 88 -> left 73, right 91)
- In-order: 20, 22, 29, 46, 57, 69, 73, 88, 91

■ III. In-Order Traversal — Tree 2 (root 58)

- Tree structure: 58 -> left 30 (left 23; right 49 -> left 31); right 75 (left 69; right 99 -> left 87)
- In-order: 23, 30, 31, 49, 58, 69, 75, 87, 99
