

Name: K RAJ BHARATH K RAJ BHARATH | **Reg. No:** RA2511003011548

Unit – 5 : Session – 7 : SLO – 1 | ARM Architecture Fundamentals

■ I. Multiple Choice

1. A. Load/store architecture — only LDR/STR access memory; all data processing works on registers.
2. C. Cortex-M — the microcontroller series (Cortex-A = application processors, Cortex-R = real-time).
3. C. 32-bit — standard ARM-state instructions are 32 bits wide (Thumb uses 16-bit).
